### CDAC - Project

#### Furniture Management System

06/2022 - 07/2022

*Description*

- We have build a Web based application for our client in our project where we have used **Java** version 17 and **Springboot** version 2.7 as our back end part and for the front end part we have used **React** version 18.1 and for the database we have used **MySQL** 8.1.
- In **Springboot** we have using various annotations and we have used CRUD operation.
- In **MySQL** we have created various tables like Category, Customers, Orders, Product, Stock, Supplier, Worker where each table has it's own parameters like for Customers we have name, email\_id, Mob. no., Address, Gender and each table is connected to other table.
- We have three layers in our project i.e, Controller layer, Service Layer and DAO layer. To consume the various services from business layer to presentation layer we have used the Rest Controller of **Springboot**.
- My role in the project was in the back end and wrote business layer logic by exposing services through **RestAPI**, also designed entity class where I have created **Database** tables using **Springboot**.
